**OCTOBER 2014**

**NEW Miele K 30000 Fully-Integrated Refrigeration Range  
Professional food storage at home**

Showcasing state-of-the-art technology, the new Miele K 30000 Fully-Integrated Refrigeration Range is not only stylish, but also equipped with extraordinary features to ensure the very best food storage conditions.

The Miele K 30000 fully integrated range comprises a choice of fridge, freezer and fridge/freezer models, with a host of options to meet the many demand of discerning householders. The various models can be conveniently installed either individually or side-by-side, to achieve both a seamless appearance and fleet design to perfectly match Miele's Generation 6000 built-in cooking appliances.

Inside, all K 30000 functions can be quickly accessed via sleek Miele touch controls. These sleek user interfaces also complement other Miele Generation 6000 built-in appliances for perfect kitchen design harmony.

The elegance of the impressive interior of all K 30000 Fridge and Fridge/Freezer models is enhanced with an exclusive new feature delivering excellent visibility, Miele's innovative **FlexiLight**. This flexible LED lighting is positioned on the front edge of the glass shelving, so that it not only illuminates the interiors with a glare-free brilliance, or it can also be positioned wherever needed at any of the rack levels.

While Miele's signature **PerfectFresh** drawers keep food fresher for up to three times longer than standard refrigerator compartments, with the release of the outstanding top-of-the-line **KFNS 37682 iD** and **KFNS 37692 iDE Fridge/Freezer** models Miele optimises the PerfectFresh principle even further with new **PerfectFresh Pro**.

The result of significant research, the innovative PerfectFresh Pro drawers in these two models keep food at an optimum temperature between 0°C and 3°C while their specially designed compartment covers have perforations to maintain a precise climate with optimum humidity levels of up to 90% for maximum freshness. Not only does PerfectFresh Pro contribute to healthy eating, it also significantly minimises food wastage.

Another Miele feature, **DynaCool**, is found in all K 30000 Fridge and Fridge/Freezer models. DynaCool ensures even air circulation so that uniform temperature and humidity levels are achieved throughout the cabinet. Furthermore, activating the **SuperCool function** enables newly introduced food items to be quickly brought down to storage temperature.

Miele K 30000 Fridge/Freezer and Freezer models all feature Miele's exclusive **NoFrost system** that eliminates the need for any manual defrosting. Formation of ice on cabinet surfaces is a thing of the past, while the circulation of cool air also prevents ice formation on frozen food.

This system is complemented by Miele's innovative **SuperFreeze** mode which ensures incredibly fast freezing of food items. The feature on all K 30000 Fridge/Freezer and Freezer models runs the freezer at full power to preserve nutrients, retain food textures and prevent the formation of ice crystals.

In addition ice cold beverages can be enjoyed at any time on select Fridge/Freezer models featuring automatic ice makers. With the option of the KFNS 37692 iDE plumbed-in IceMaker or KFNS 37452 iDE with the MyIce water tank, these Miele Fridge/Freezers can produce approximately 100 ice cubes a day.

Select K 30000 models also feature the convenient **VarioRoom** and **VarioBord** storage concept. This allows the spacing between racks and shelves to be adjusted to meet individual needs. The inserts can even be removed entirely and carried to the table for serving.

Furthermore, all K 30000 doors close silently and gently with **SoftClose**, the innovative anti-slam system from Miele. The doors conveniently close automatically when the opening angle is less than 30° to prevent bottles in the door rack from rattling.

Select K 30000 models with PerfectFresh or PerfectFresh Pro drawers are also equipped with **SelfClose**, fully telescopic runners and a self-closing mechanism with an anti-slam feature. The drawers can be pulled out to their full depth and closed automatically again by a gentle touch. In addition, LED lighting above the drawers perfectly illuminates food.

Miele **ComfortClean** on all K 30000 models delivers exceptional cleaning convenience, feature. Door racks are made from high-quality temperature resistant and transparent SAN plastic which is scratch-proof, resistant to chemicals and even dishwasher-safe.

Offering a host of installation possibilities as well as the food storage of professional standards at home, Miele's K 30000 Fully-Integrated Refrigeration Range is an exceptional choice to complete any kitchen design and is available from Miele Chartered Agents from a list price of \$3,199.
