

Lancray residential home*

A newly built residential home providing a personalised care experience

Subject to residents needs, Lancray provide a variety of care services within their new privately-run 60 bed aged care facility. The premises have been purpose-built with a focus on promoting independent living for more able residents and temporary occupants in recovery.

The facility is designed with smaller living units of 7-15 residents, centralized around a break-out kitchen. The staff and residents are encouraged to contribute to domestic duties, simulating a home-like environment and lifestyle. In addition, many residents bring their own bedding and soft furnishings in order to personalize their rooms.

All laundry is washed as part of the central laundry system by care workers, with flexibility to wash single items such as residents delicate garments.

The break-out kitchens require simple and easy-to-operate dishwashers that look and feel like domestic appliances, but machines that can achieve high temperatures, meeting hygiene standards.

Lancray new laundry

Benefits and ROI

Streamlined processes for larger quantities of laundry and cost savings

Hygiene and incontinence cycles can be accessed if required

Machine longevity and commercial quality

Number of beds:
60

Challenges:
- **Large weekly loads**
- **Independent user-friendly**
- **Energy & cost reduction**

Lancray needs:

- To cater for 1650kg of laundry plus per week
- Low energy consumption machines for cost savings
- Economical laundry processes for large quantities
- Laundering of residents delicate personal belongings

✓ Miele recommends:

Central laundry:

- ✓ **2 x PW818** 18-20kg washers
- ✓ **1 x Little Giant PW6065** 6.5kg washer
- ✓ **2 x PT8403** 16-20kg dryers

- 18-20kg washing machines for large laundry volumes, equipped with special disinfection programs.
- Little Giants washing machine ideal for quick, small loads of residents personal belongings.
- Programmable controls enable the machines to be adapted to suits individual requirements.

Break-out kitchen:

- ✓ **5 x PG8059** dishwashers

- The PG8059 freshwater dishwashers have fast cycle times, a hygienic clean achieving 85°C final rinse temperature and are simple, familiar to use like a domestic machine.

Implementation plan

1. A Miele representative was consulted before building plans to advise on laundry facility needs
2. The Miele representative surveyed the site to ensure safe implementation
3. Advice was included into plans to build facilities
