# Baking, Roasting, Moisture Plus

The cookbook

Dear connoisseurs,

Memorable moments and lively conversations happen when we meet over a meal. Food is the thing that connects us, whether it's a special occasion or simply the evening meal.

Your new Miele oven offers you precisely this potential: as a true all-rounder, you can use it to prepare quick and healthy everyday meals and also culinary menus of the highest quality.

This book is designed to be a genuine aid in the kitchen. Every day, knowledge, curiosity, routine and the unexpected all converge in our Miele test kitchen. We have condensed our experience, passion and pleasure of experimenting with food into this cookbook by creating recipes that are as imaginative as they are successful. You can also get more recipes and inspiration in our Miele@mobile App.

If you have any questions or comments, please give us a call on the number shown at the back of this book.

Happy cooking from

Your Miele Test Kitchen Team

Before you start, we have prepared some tips on how to use this cookbook.

For every Automatic programme there is a matching recipe, which facilitates your introduction to using your Miele oven.

In many Automatic programmes you can fine tune the cooking result to your tastes - the degree of browning for bread and baked goods and the degree of doneness for meat.

## About Automatic programmes

- Automatic programmes are not available on all models. Even if the appropriate Automatic programme is not available, you can still make all the recipes. To do this, you can use manual settings. Any differences will be outlined in the preparation text.
- At the end of every recipe with an Automatic programme, the path for selecting the Automatic programme is shown under setting details.
- The median programme duration is always shown for Automatic programmes and is set at the factory. With many programmes the actual duration depends, however, on the selected degree of doneness. Select this prior to the start of the Automatic programme.

## About ingredients

- If a comma (,) comes after an ingredient, the subsequent text will describe the food. In most cases the food comes with such a description when purchased: e.g. Eggs, Size M; Milk, 3.5% fat.
- If a vertical line (|) is shown after a single ingredient, the description refers to how the food is handled or processed, which is generally carried out by the person doing the cooking. This processing step will then not be mentioned in the preparation text: E.g. Cheese, aromatic | grated; Onions | finely diced; Milk, 3.5% fat | lukewarm.
- In the case of meat, if no other description is available, the weight of the meat is given.
- For fruit and vegetables, the weight refers to a peeled, non-pitted condition.
- Fruit and vegetables should always be cleaned/washed or, if necessary, peeled. This processing step is not repeated in the preparation text.

# About this book

---

## Features of individual oven models

This cookbook is included with ovens with different oven compartment sizes. When the ingredient quantities or settings deviate from one another, the settings to be selected are specified in the recipes in the following order:

- ovens with 5 shelf levels
- [ovens with 3 shelf levels] in square brackets
- (90 cm ovens) in round brackets

If the settings are the same for all ovens, they are shown without brackets.

If your oven does not have Special applications | Prove yeast dough, **instead select** Automatic programmes | Cakes | Yeast dough. **Alternatively, you can use the Conventional Heat function at a temperature of 30 °C and place a damp towel over the dough.**

If your oven does not have the Moisture Plus + Conventional Heat, Moisture Plus + Auto Roast, Moisture Plus + Fan Plus or Moisture Plus + Intensive Bake **functions, select the Moisture Plus function. With Moisture Plus + Conventional Heat, select a temperature 20 °C lower than that given in the manual settings.**

If your oven does not have Special applications | Low temperature cooking, **use the Conventional Heat function. Pre-heat the oven at 120 °C for 15 minutes. After placing the food in the oven, reduce the temperature to about 100 °C.**

For oven models with FlexiClip telescopic runners that are fitted on top of the shelf runners and therefore sit a

little higher: if possible, fit these runners one shelf level lower than stated in the recipe and place the tray/dish on them.

If you are using FlexiClip telescopic runners that are fitted between shelf runners of a shelf level and therefore sit on the same level, the shelf levels stated in the recipe will apply.

## About the settings

- Temperatures and durations: temperature and duration ranges are given. Generally select the lower setting and then visually check the food or use a food probe to determine if the duration needs to be extended.
- Shelf levels: the shelf levels which trays and racks are placed on are numbered from bottom to top.

## Moisture Plus

For baking and roasting with moisture injection. This function is ideal for baking bread and biscuits and for cooking fish and meat.

With Moisture Plus, bread comes out with a particularly even crumb (the inside of the bread) and crispy crust (crunchy on the outside but not brittle). Yeast-based doughs prove particularly well. Meat and fish are cooked gently and stay succulent.

Choose from the following combination options:

Moisture Plus + Fan Plus

Moisture Plus + Conventional Heat

Moisture Plus + Auto Roast

Moisture Plus + Intensive Bake

## Fan Plus

For baking and roasting. You can cook on several shelf levels at the same time. Because the fan distributes the heat to food straight away, it allows you to use a lower temperature than you would with “Conventional Heat”.

## Conventional Heat

For baking and roasting traditional recipes, cooking soufflés and cooking at low temperatures. If using an older recipe or cookbook, set the oven temperature 10 °C lower than that recommended. This will not change the cooking duration.

## Intensive Bake

For baking cakes with a moist topping which require a crisp base. This function is not suitable for baking thin items or for roasting as the baked items and roasting juices will become too dark.

## Auto Roast

For roasting. During the searing phase the oven automatically heats up to a high temperature to seal the meat. As soon as this temperature has been reached, the oven temperature automatically drops back down to the pre-selected cooking temperature. The meat will be browned perfectly on the outside and the cooking process can continue to the end without needing to change functions.

# Overview of functions

---

## Bottom Heat

Use this function towards the end of cooking to brown the base of the food.

## Top Heat

Use this function towards the end of cooking to brown the top of food.

## Full Grill

For grilling and toasting bread, open sandwiches etc. and browning baked dishes. The whole of the top heat/grill element will get hot and glow red.

## Economy Grill

For grilling thin cuts in small quantities and for browning small baked dishes. The inner part of the grill heating element will get hot and glow red.

## Fan Grill

For grilling thicker items, e.g. rolled meat, poultry pieces. Because the fan distributes the heat to food straight away, it allows you to use a lower temperature than you would with the Grill function.

## Eco Fan Heat

Suitable for small amounts, e.g. frozen pizzas, bake-off rolls, biscuits and for meat dishes and roasts. You can save up to 30% energy compared to cooking with a standard oven function as long as the door is kept shut during cooking.

## User programmes

You can create and save up to 20 of your own programmes and give them individual names. You can combine up to 10 cooking stages to achieve the perfect result for your favourite recipe, or make everyday cooking easier by saving frequently used settings. In each cooking stage you can select settings such as function, temperature and duration or core temperature.

## TasteControl

The TasteControl function is used to cool down the oven compartment and the food quickly once the food has been cooked. This prevents the food from burning or overcooking. When TasteControl is combined with the Keeping warm function below, you can achieve optimum results in terms of timing and taste.

## Auto switch-off

Your oven contains intelligent electronics which provide the greatest of user convenience. The oven switches off automatically when the cooking duration has elapsed.

## Timer

By entering a specific cooking duration, a “Finish at” or a “Start at” time, you can control cooking processes in advance and have the oven switch off or switch on and off automatically.

## Cooking durations

The duration required for cooking can be set in advance. The heating will switch off automatically once this duration has elapsed. If you have selected the “Pre-heat” function, the cooking duration only begins once the selected temperature has been reached and the food has been placed in the oven.

## Pre-heating

It is only necessary to pre-heat the oven in a few instances. Most dishes can be placed in a cold oven. They will then make use of the heat produced during the heating-up phase. If pre-heating is necessary, instructions to do so will usually be given in the settings charts for the recipe. Pre-heat the oven when cooking:

- cakes and biscuits with a short baking time (up to 30 minutes)
- dark bread dough
- beef sirloin joints and fillet

## Booster

You can use the Booster function to get your oven interior up to the required temperature as quickly as possible. If you selected a temperature above 100 °C and the Booster function is switched on, the top heat/grill element, ring heating element and fan will all switch on at the same time. This will rapidly accelerate the heating-up time.

## Crisp function

Select the Crisp function function for items which are supposed to be crispy. Moisture reduction in the oven leaves chips, pizza, quiche etc. crispy. Even the skin of poultry becomes crispy, while the meat remains juicy. The Crisp function function can be used with every oven function and can be switched on when needed.

# General notes

---

## Food probe

The food probe enables precise temperature-controlled cooking – some Automatic programmes and Special applications will specifically prompt you to use the food probe.

The metal tip of the food probe is inserted into the food and measures the core temperature of the food during cooking. The core temperature of the food reflects the progress of cooking. Set a lower or higher (max. 99 °C) core temperature, depending on whether you want your roast to be medium or well-done.

Application: the metal tip of the food probe must be fully inserted into the centre of the food. For smaller pieces of meat, you can use a piece of potato or meat trimmings (offcuts and sinews) to cover the protruding part of the thermometer. Otherwise the displayed core temperature may be incorrect.

## Special applications

Depending on model, your oven has a number of Special applications. The following is a list of these.

### Proving yeast dough

For the reliable and easy proving of yeast dough. You can select a proving time of 15, 30 or 45 minutes. Leave the dough to prove uncovered in the moist, warm oven compartment until it has doubled in volume.

### Low temp. cooking

For gentle cooking of especially tender meat. The low temperature and particularly long cooking duration leave the meat perfectly cooked and incomparably tender.

### Sabbath programme

The Sabbath programme is for religious observance. Select the Sabbath programme and then select the oven function and temperature. The programme will only start after the door is opened and closed:

### A quick guide to cooking

Term	Explanation
Cracking	Term for desired breaks in the crust of baked goods.
Boned	Fish or meat from which bones have been removed.
Fracturing	Fracturing refers to the small hairline cracks that develop on a crust.
Ready to cook	Food that has been trimmed/cleaned but not yet prepared. It is used, for example, for meat where the fat and sinew has already been removed, fish where the scales and skin have been removed, or fruit and vegetables where the skin has already been removed and the flesh has been washed.
Dough piece	A worked and shaped piece of raw dough.
Dough seam	Term for the join in the bread that develops during shaping.
Crusty	Term for the flaky texture of the crust.
Rounding	Technique for shaping bread and bread rolls. You can find a precise description in the “Bread & rolls” section.

## Quantities and weights

tsp. = teaspoon

tbsp. = tablespoon

g = gram

kg = kilogram

ml = millilitre

Pinch

### **1 teaspoon is equal to approx.**

- 3 g baking powder
- 5 g salt/sugar/vanilla sugar
- 5 g flour
- 5 ml liquid

### **1 tablespoon is equal to approx.**

- 10 g flour / cornflour / breadcrumbs
- 10 g butter
- 15 g caster sugar
- 20 ml liquid
- 10 g mustard

### **Fresh yeast to dry yeast conversion: divide amount by 3.**

- For example: 21 g of fresh yeast = 7 g dry yeast.

## Accessories

With our large selection of accessories we can help you to achieve the best cooking results possible. Each component in its size and function is specially suited to Miele ovens and is rigorously tested according to Miele standards. All products can be purchased online from the Miele website or from Miele directly.

### PerfectClean

Cleaning has never been easier: thanks to the unique PerfectClean enamel surface of the oven interior, fresh soiling can be removed with minimal effort.

This special technology is also used on Miele baking trays, making the use of baking paper redundant. Bread and biscuits do not stick, and slide off the trays with ease.

The high quality scratch resistant surface even enables pizza, cakes etc. to be cut directly on the tray. After use everything can simply be wiped clean.

### Baking tray

The flatter baking tray is perfect for all dishes that only release a small amount of liquid during baking or cooking. For example, it can be used for biscuits, bread, chips and roasted vegetables.

### Universal tray

Use the deeper universal tray for deeper, filled cakes, for catching meat juices or for gently roasting meat.

### Gourmet baking tray

The perforated Gourmet baking tray has been specially developed for the Moisture Plus function. It is particularly well suited for baked goods made using fresh yeast-based dough and quark and oil dough, bread and bread rolls. The tiny perforations assist in browning the underside of baked goods.

The Gourmet baking tray is also suitable for drying or desiccating fruit and vegetables.

### Round baking tray

The round baking tray is suitable for all foods that have a round shape, such as pizza, quiche and tarts.

The PerfectClean enamel surface makes additional greasing or the use of baking paper redundant. The round baking tray can also be purchased with perforations to ensure the optimum utilisation of Moisture Plus.

# Miele accessories

---

## Grilling and roasting insert

The grilling and roasting insert is placed on the universal tray to prevent the food from sitting in the juices that escape during the cooking process. This keeps the outside crisp and prevents the juices from baking on. The collected juice is perfect for making gravy.

The ridged and grooved shape of the grilling and roasting insert also prevents grease spatter and excessive soiling in the oven compartment.

## Miele Gourmet oven dish

The Miele Gourmet oven dish was developed for the optimum combination of a cooktop and a built-in appliance. After searing on the cooktop, the Gourmet oven dish can easily be placed on the shelf runners of the oven interior. Basting with meat juices or stirring is particularly convenient thanks to the FlexiClips as you can simply pull the Gourmet oven dish out of the oven compartment instead of lifting it out.

The Gourmet oven dish has a non-stick coating and is suitable for preparing braised dishes, meat, soups, sauces, casseroles and even sweet dishes. Suitable lids are also available.

## FlexiClip telescopic runners

The FlexiClip telescopic runners enable you to pull out individual baking trays or racks safely and conveniently. They can be easily positioned at the different levels inside the oven compartment and can also be conveniently moved to another level. The FlexiClip telescopic runners are available with a PerfectClean finish or as a PyroFit version.

## Care products

With regular cleaning and care of your oven you will ensure reliable functioning and years of enjoyment with your appliance. Original Miele care products are best suited to Miele ovens. These products can be purchased online from the Miele website or from Miele directly.

## Miele oven cleaner

The Miele oven cleaner distinguishes itself through its grease removing properties and its ease of use. Its gel-like consistency means it also sticks to the walls of the oven. Its special formula enables effortless cleaning with short soaking times and without needing to heat up the oven.

## Descaling tablets

Miele has developed special descaling tablets for the water pipework and containers. Descaling is not only highly effective, but also particularly gentle on the materials.

## **Truly scrumptious**

Cakes and tortes are as essential a part of a nice morning coffee or a cosy afternoon tea as a beautifully set table and stimulating discussions. If you want to spoil your guests and yourself with delicious homemade treats, your only problem will be to choose from among the wealth of different recipes. Do you like it fruity? Or creamy? Or crispy? And because sweet things are food for the soul, everyone will want another slice.

## Tips on preparation

Get the best results when baking with a few simple tips. The Miele test kitchen would like to share some of its expert knowledge with you.

## Types of flour

Different types of flour contain varying amounts of whole grain.

They also contain varying amounts of minerals. The higher the type number, the more mineral nutrients the flour contains. The different types of flour are categorised by how finely they have been ground:

### Plain flour

Plain flour is a fine white flour which is equally suitable for cooking and baking. It consists primarily of starch and gluten.

### Strong white flour or brown flour

These are multi-purpose flours for a light dough.

### Wholemeal flour

This flour consists of almost all the wheat germ. Its colour is about mid-way between white flour and full-grain flour. For a lighter dough, you can replace half of this with strong white flour without any problems.

### Mixed grain

This is a dark flour that contains almost all the wheat germ. It is the perfect choice for breads.

### Wholegrain flour

It is made from the whole grain and contains all the goodness. It can be ground finely or coarsely and is particularly good for bread.

## Raising agents

Raising agents are used to make the dough rise and help it stay light and airy after kneading or mixing.

### Yeast

Yeast is a natural raising agent to help dough leaven. Fresh and dry yeast are equally suitable for baking. To create a rise, the yeast organisms require heat (temperatures from 35 °C to a maximum of 50 °C), time and nutrition in the form of flour, sugar and liquid.

## **Baking powder**

Baking powder is the most common chemical raising agent. The tasteless white powder made primarily from sodium carbonate is very versatile and can be used for various dough types.

## **Ammonium bicarbonate**

Ammonium bicarbonate or potassium carbonate are typical raising agents for Christmas bakes such as honey cake and gingerbread.

## **Sodium bicarbonate (baking soda)**

Sodium bicarbonate is a white powder with a mild, slightly alkaline taste. It is a constituent of baking powder and also speeds up the cooking of pulses.

## **Dough and mixtures**

### **Sponge mixture**

Sponge mixture is a lighter, delicate dough. This texture is achieved by beating egg yolks and whole eggs and folding into stiffly whipped egg whites.

### **Tips for making the mixture:**

It is best to use cooled eggs.

Beat the egg white mixture as much as possible.

Bake the dough as soon as you have made it.

### **Tips for baking:**

Don't let the cake become too dark. Otherwise the top of the dough will harden and may crack more easily.

### **Tips after baking:**

The warm cake can be removed from the baking paper more easily if you moisten the bottom of the paper with some water.

If the sponge base is going to be the basis for a cake, you should bake it the day before as this will make cutting easier and more accurate.

To divide the cake horizontally, it is best to use a sharp knife to make cuts at regular intervals around the outside of the cake. Insert a thread into the cuts and cross the ends at the front. Pulling the ends of the thread apart will divide the cake evenly into 2 bases.

### **Puff pastry**

Puff pastry consists of multiple layers that open up and flake during baking.

# Cakes

---

## Tips:

Do not knead the dough pieces because this will stop the pastry from flaking. It is better to place the dough pieces on top of each other and roll them out again.

Adding moisture during the first cooking stage improves the flakiness of the pastry and creates a wonderful shine on the pastry surface.

## Choux pastry

A unique method is required to make this pastry. The dough is “burned off” in a saucepan and then baked.

## Tips:

It is essential to leave the oven door closed during the first 10 minutes of baking. The choux pastry is so sensitive during this time that opening the door would stop the pastry becoming light and airy.

Fill choux buns or éclairs just before serving. This keeps the bake nice and crisp.

## Shortcrust pastry

Shortcrust pastry comes out particularly well when baked in ovens with a moisture function because the steam supplied to the dough makes it particularly short.

## Tips:

Only knead your dough for a short time because a long kneading time will take away the desired crumbly consistency of the pastry.

In order to achieve a short kneading time, use soft fat where possible.

The chilling time after kneading enhances the desired crumbly consistency of the finished bake.

When rolling out the dough, use as little flour as possible. This will allow the dough to retain its elasticity.

The dough pieces can always be kneaded together again. If the dough turns too crumbly, just add some water.

Shortcrust pastry can be prepared in advance. When packaged correctly, it can stay fresh for 2–3 days in the fridge.

## Cake batter

Cake batter is a creamy, viscous dough that is mainly made from fat, sugar and eggs. These ingredients ensure that the cake is nice and moist.

### Tips:

Cream the sugar and butter and mix in the other ingredients quickly.

All ingredients used should be at room temperature.

If the consistency of the batter becomes too stiff, you can add some liquid, for example, milk.

Dust fruit, nuts and chocolate chips with some flour and mix them into the batter just before baking. This keeps these ingredients evenly distributed in the cake during baking.

Bake the dough as soon as it has been made.

To test if the cake is done, simply insert a wooden skewer into the cake. The cake is cooked through when the skewer comes out without any moist cake crumbs sticking to it.

The warm cake can be removed from the baking paper more easily if you moisten the bottom of the paper with some water.

## Quark dough

Quark dough is a quick alternative to yeast-based dough and has a very similar end result when it is freshly baked.

### Tips:

Only knead the ingredients for a short time. Otherwise there is a risk that the dough will become too sticky.

Bake the dough as soon as you have made it.

## Apple sponge

Preparation time: 95 minutes

Serves 12

### For the topping

500 g apples, sharp

### For the dough

150 g butter | softened

150 g caster sugar

1 ½ tsp. vanilla sugar

3 medium eggs

1 tbsp. lemon juice

150 g plain white flour

½ tsp. baking powder

### For the cake tin

1 tsp. butter

### For dusting

1 tbsp. icing sugar

### Accessories

Rack

Springform cake tin, Ø 26 cm

Fine sieve

### Preparation

Peel and quarter the apples. Starting on the curved side, cut 1 cm thick slices, mix with lemon juice and place to one side.

Grease the springform tin.

Cream together the butter, sugar and vanilla sugar in approx. 2 minutes. Fold in each egg for half a minute.

Place the rack in the oven. Start the Automatic programme or pre-heat the oven.

Sift the baking powder and flour together and beat into the other ingredients.

Spoon evenly into the greased springform cake tin. Press the apples gently into the cake mix with the curved side up.

Place the springform tin in the oven and bake until golden.

Leave the cake in the tin for 10 minutes after baking. Turn out onto the rack and leave to cool. Dust with icing sugar.

### Settings

#### Useful tip

Instead of dusting with icing sugar, you can spread some slightly warm apricot jam over the top.

## Apple pie

Preparation time: 100 minutes

Serves 12

### For the dough

200 g butter | softened

100 g caster sugar

3 tsp. vanilla sugar

1 medium egg

350 g plain white flour

1 tsp. baking powder

A pinch of salt

### For the topping

1.25 kg apples

50 g raisins

½ tbsp. Calvados

½ tbsp. lemon juice

½ tsp. ground cinnamon

50 g caster sugar

### For the cake tin

1 tsp. butter

### For glazing

100 g icing sugar

1 tbsp. water | warm

### Accessories

Springform cake tin, Ø 26 cm

Cling film

Rack

### Preparation

Cream together the butter, sugar, vanilla sugar and egg for the dough. Sift in the flour, baking powder and salt and knead. Chill the dough for one hour.

Peel and slice the apples into wedges.

Mix with the raisins, Calvados, lemon juice and cinnamon.

Grease the springform tin.

Divide the dough into 3 pieces. Roll out the first piece of dough on the base of the springform tin. Assemble the

springform tin. Make a long roll out of the second piece of dough and press around the side of the tin about 4 cm high. Pierce the base several times with a fork.

Place the rack in the oven. Start the Automatic programme or pre-heat the oven.

Place the third portion of the dough between 2 layers of cling film and roll it out to the size of the springform tin.

Fold the sugar into the apples and distribute them evenly over the base. Put the pastry lid on top and pinch the edges to seal.

Place the springform tin in the oven and bake.

Leave to cool in the tin for 10 minutes. Turn out onto the rack and leave to cool.

Stir the icing sugar into the water and spread over the pie.

## Apricot tart with cream topping

Preparation time: 80 minutes

Serves 12

### For the dough

250 g plain white flour

1 tsp. baking powder

125 g butter

125 g caster sugar

1 medium egg

### For the topping

800 g tinned apricots (drained weight)

### For the filling

250 g cream

2 medium eggs

1 tbsp. cornflour

3 tsp. vanilla sugar

½ lemon | juice only

### For the cake tin

1 tsp. butter

### Accessories

Springform cake tin, Ø 26 cm

Rack

### Preparation

Mix together the flour, baking powder, butter, sugar and egg and knead to form a smooth dough. Grease the springform tin. Spread the mixture evenly over the base of the springform tin.

Place the apricots on top of the mixture with the curved side facing upwards.

Mix together all the ingredients for the cream mixture. Spread over the apricots.

Place on the rack in the oven and bake until golden.

## Pear cake with almond topping

Preparation time: 95 minutes

Serves 20

### For the base

470 g plain white flour

125 g caster sugar

4 tsp. vanilla sugar

250 g butter

1 medium egg

### For the topping

3 tins of pears (460 g each)

### For the cake batter

550 g crème fraîche

2 tbsp. cornflour

4 medium eggs

65 g caster sugar

2 tsp. cinnamon

40 g flaked almonds

### Accessories

Universal tray

### Preparation

Mix together the flour, sugar, vanilla sugar, butter and egg and knead to form a smooth batter. Roll the mixture out onto the universal tray.

Cut the pears into slices 1 cm thick and arrange evenly on top of the mixture.

Mix together the crème fraîche, cornflour, eggs, sugar, vanilla sugar and cinnamon.

Pour over the pears. Scatter with flaked almonds.

Place the universal tray in the oven and bake until pale yellow.

## Deep sponge base

Preparation time: 75 minutes

Serves 16

### For the dough

4 medium eggs  
2 tbsp. water | hot  
175 g caster sugar  
200 g plain white flour  
1 tsp. baking powder

### For the cake tin

1 tsp. butter

### Accessories

Rack  
Fine sieve  
Springform cake tin, Ø 26 cm  
Baking paper

### Preparation

Separate the egg whites from the yolks. Beat the egg whites with the water until stiff. Slowly add the sugar, beating after each addition. Whisk and then fold in the egg yolks.

Place the rack in the oven. Start the Automatic programme or pre-heat the oven.

Stir the baking powder into the flour, sift over the egg mixture, and then gently fold into the egg mixture with a large egg whisk.

Grease the base of the springform tin and line with baking paper. Pour the mixture into the springform tin and level with a spoon or spatula.

Place in the oven and bake until golden.

Allow the cake to cool in the tin for approx. 10 minutes after baking. Turn out onto the rack and leave to cool. Cut horizontally through the cake twice to make 3 layers.

Spread over the prepared filling.

## Sponge base filling

Preparation time: 30 minutes

### For quark and cream filling

500 g quark, 20% fat  
100 g caster sugar  
100 ml milk, 3.5% fat  
1 ½ tsp. vanilla sugar  
1 lemon | juice only  
6 gelatine leaves  
500 g cream

### For dusting

1 tbsp. icing sugar

### For cappuccino filling

100 g dark chocolate  
500 g cream  
6 gelatine leaves  
80 ml espresso  
80 ml coffee liqueur  
3 tsp. vanilla sugar  
1 tbsp. cocoa powder

### For glazing

3 tbsp. whipped cream

### For dusting

1 tbsp. cocoa powder

### Accessories

Serving plate  
Fine sieve

### Preparation for quark and cream filling

Mix together the quark, sugar, milk, vanilla sugar and lemon juice. Soak the gelatine in cold water. Squeeze the gelatine, then dissolve it in the microwave or in a pan on the cooktop on a low heat.

Stir a portion of the quark mixture into the gelatine.

Stir this mixture into the remaining quark mixture and place in the refrigerator to chill. Whip the cream until stiff and fold into the quark mixture.

Place one layer of cake on a serving platter and spread half of the quark mixture over it. Top it with another layer of the cake. Add the other half of the mixture, then top it with the final piece of the cake.

Place in the refrigerator to chill. Dust with icing sugar before serving.

## **Preparation for cappuccino filling**

Melt the chocolate for the cappuccino filling. Whip the cream until stiff. Soak the gelatine in cold water. Squeeze the gelatine, then dissolve it in the microwave or in a pan on the cooktop on a low heat. Leave to cool slightly.

Stir half the espresso and half the coffee liqueur into the gelatine and add to the whipped cream.

Divide the coffee and cream mixture in half. Stir the vanilla sugar into one half and the chocolate and cocoa into the other half.

Place one layer of cake on a serving platter and drizzle with a little coffee liqueur and espresso, and spread the chocolate cream over this. Top with the second layer of cake, drizzle with the remaining liqueur and espresso and spread this with the vanilla cream. Top with the final layer of cake, spread with cream and dust with cocoa.

## **Useful tip**

For a fruity variation, add some grated lemon zest and 300 g drained mandarin segments or apricot pieces.

### Preparation for advocaat and cream filling

Soak the gelatine in cold water. Squeeze the gelatine, then dissolve it in the microwave or in a pan on the cooktop on a low heat. Leave to cool slightly.

Stir a portion of the advocaat into the gelatine. Add to the remaining advocaat and fold in. Place in the refrigerator to thicken.

Whip the cream until stiff. Once the advocaat has thickened a little, carefully fold in the cream. Leave to thicken in the refrigerator for 30 minutes.

Then spread the mixture over the cake. Roll up from the long side and leave to chill until it is ready to eat.

Dust with icing sugar shortly before serving.

## **Preparation for the cranberry and cream filling**

Whip the cream and vanilla sugar together until stiff.

Spread the cranberries over the cake. Spread the cream over the top. Roll up from the long side and leave to chill until it is ready to eat.

Dust with icing sugar shortly before serving.

## **Preparation for mango and cream filling**

Purée the mangoes with the orange zest, sugar, and orange and lime juice.

Soak the gelatine in cold water. Squeeze the gelatine, then dissolve it in the microwave or in a pan on the cooktop on a low heat. Leave to cool slightly.

Stir a little of the mango purée into the gelatine. Add this to the rest of the mango purée, stirring it in. Place in the refrigerator to thicken.

Whip the cream until stiff. Once the mango mixture has thickened a little, carefully fold in the cream. Leave to thicken in the refrigerator for 30 minutes.

Then spread the mixture over the cake. Roll up from the long side and leave to chill until it is ready to eat.

### Preparation

Melt the butter and chocolate. Add the hazelnuts, sugar, espresso and bourbon vanilla essence. Leave to cool.

Separate the egg whites from the yolks. Fold the egg yolks into the butter and chocolate mixture. Whisk the egg whites until stiff and fold into the mixture.

Start the Automatic programme or pre-heat the oven.

Grease the springform tin and line with baking paper or grease the ramekins. Pour the mixture into the springform tin or into the ramekins.

Place on the rack in the oven and bake.

Chill for 12 hours before serving.

## Stollen

Preparation time: 160 minutes

Makes one 15-slice loaf

### For the dough

42 g fresh yeast

1 ½ tsp. vanilla sugar

70 ml milk, 3.5% fat | lukewarm

200 g raisins

50 g chopped almonds

50 g candied lemon peel

50 g candied orange peel

1–1 ½ tbsp. rum

275 g butter | softened

500 g plain white flour

A pinch of salt

100 g caster sugar

½ tsp. lemon zest

1 medium egg

### For glazing

75 g butter

### For sprinkling

50 g caster sugar

### For dusting

35 g icing sugar

### Accessories

Baking tray or universal tray

### Preparation

Dissolve the yeast and vanilla sugar in the milk and leave covered for 15 minutes.

Mix the raisins, almonds, lemon peel and orange peel in the rum and place to one side.

Knead together the yeast milk, butter, flour, salt, sugar, lemon zest and egg to form a smooth dough. Add the lemon peel, orange peel, raisins, almonds and rum and knead briefly.

Place the dough in a bowl in the oven and cover it with a damp cloth. Prove the dough using the indicated settings.

Shape the dough into a 30 cm long stollen loaf on a lightly floured surface. Place on the baking tray or universal tray, place in the oven and bake.

Melt the butter for glazing and brush it onto the stollen while still warm. Sprinkle over the sugar.

Leave to cool and then dust generously with icing sugar.

## Fruit streusel cake

Preparation time: 150 minutes

Serves 20 (30)

### For the dough

42 (63) g fresh yeast  
150 (220) ml milk, 3.5% fat | lukewarm  
450 (680) g plain white flour  
50 (80) g caster sugar  
90 (140) g softened butter  
1 (2) medium egg(s)

### For the topping

1.25 (1.9) kg apples

### For the streusel

240 (360) g plain white flour  
150 (230) g caster sugar  
16 (24) g vanilla sugar  
1 (2) tsp. cinnamon  
150 (230) g softened butter

### Accessories

Baking tray or universal tray

### Preparation

Stir the yeast into the milk to dissolve it. Add to the flour, sugar, butter and egg, and knead to a smooth dough.

Shape the dough into a ball and place it in the oven in an uncovered bowl. Prove according to the settings in proving phase 1.

Peel and core the apples and slice them into wedges.

Lightly knead the dough and then roll it out on a baking tray or the universal tray. Spread the apples evenly across the dough. Mix together the flour, sugar, vanilla sugar and cinnamon.

Then knead in the butter to create a streusel mix. Scatter this over the apples.

Place the cake in the oven and prove the dough using the settings indicated for proving phase 2.

Bake the cake until golden brown.

## Linzer biscuits

Preparation time: 70 minutes

Makes 30

### For the biscuits

200 g butter

300 g plain white flour

100 g icing sugar

1 ½ tsp. vanilla sugar

2 medium eggs | yolk only

100 g ground almonds

Grated zest of ½ unwaxed lemon

### For the filling

200 g redcurrant jelly

### Accessories

Cling film

Baking tray or universal tray

Round biscuit cutters (in 2 sizes)

### Preparation

Dice the butter, add to the flour, icing sugar, vanilla sugar, egg yolk, almonds and lemon zest and knead to form a smooth dough. Wrap in cling film and chill in the fridge for 30 minutes.

Roll out the dough to a thickness of 2 mm and cut it out into circles. Make a small hole in the middle of half of the biscuits (if the biscuits are larger, make 3 holes).

Place the biscuits onto the baking tray or universal tray, place in the oven and bake until pale yellow.

## Choux bun fillings

Preparation time: 20 minutes

For 12 (18) choux buns

### For the mandarin and cream filling

400 (600) ml thickened cream

16 (24) g vanilla sugar

350 (530) g tinned mandarins (drained weight)

### For the morello cherry and cream filling

350 (530) g morello cherries from a jar (drained weight)

100 (150) ml morello cherry juice (from the jar)

40 (60) g caster sugar

1 (1 ½) tbsp. cornflour

½ (1) tbsp. water

500 (750) ml thickened cream

30 (40) g icing sugar

8 (12) g vanilla sugar

### For the coffee and cream filling

750 ml (1.125 l) thickened cream

100 (150) g caster sugar

2 (3) tsp. instant coffee

### For sprinkling

1 tbsp. icing sugar

### Accessories

Piping bag

Star nozzle, 12 mm

### Method for the mandarin and cream filling

Beat the cream together with the vanilla sugar until stiff. Drain the fruit and place it on the bottom halves of the choux buns. Pour the cream into a piping bag and pipe the cream onto the fruit.

Place the top halves on top of the filling and dust with icing sugar to serve.

## **Method for the morello cherry and cream filling**

Drain the cherries and keep the juice.

Bring the cherry juice and sugar to the boil.

Mix the cornflour with some water and stir it into the hot liquid. Bring to the boil, add the cherries and then chill.

Beat the cream for around ½ minute. Sift the icing sugar and mix it together with the vanilla sugar. Add the sugar mix to the cream and beat until stiff.

Fill the bottom halves of the choux buns with the cherry mixture. Pour the cream into a piping bag and pipe the cream onto the cherries.

Place the top halves on top of the filling and dust with icing sugar to serve.

## **Method for the coffee and cream filling**

Beat the cream with the sugar and instant coffee until stiff and pour the mixture into a piping bag.

Pipe the coffee cream onto the bottom halves of the choux buns.

Place the top halves on top of the filling and dust with icing sugar to serve.

## **A crispy crust with a light and soft centre**

Freshly baked bread still warm from the oven is one of the easiest things to make. Whether enjoyed as a weekend breakfast treat with lashings of butter and jam, or as a hearty snack after a hard day's work, bread is loved by (almost) everyone.

## Tips on preparation

To get the best results with your bread, we have compiled some of the most important tips for making dough.

The right kneading time is crucial for baking a good loaf:

- Firm doughs require a shorter kneading time than softer doughs.
- Doughs with rye flour require a shorter kneading time than doughs with wheat flour.

Bread and bread roll doughs are leavened with yeast or sourdough. To give the microorganisms inside the yeast optimum working conditions and for the dough to rise as much as possible, there needs to be a warm, moist environment. We therefore recommend using a special Automatic programme to prove your yeast-based dough.

Introducing moisture during baking has 2 positive effects:

- A skin forms on the dough very slowly during baking. This means the bread has longer to rise.
- The gelatinisation of starch on the surface of the bread produces a shiny, crunchy crust.

## Preparation of yeast-based dough for bread

1. Make and prove the yeast-based dough according to the recipe. You can also find helpful videos about shaping bread and bread rolls in the Miele@mobile App.
2. The consistency of the dough determines whether or not you need to dust your work surface with flour during preparation: if the dough sticks to your fingers when you touch it, you should always lightly flour your work surface.
3. Pull the dough up slightly from the outside and press down firmly in the middle. Repeat this process at least six times. The dough should sit with the dough seam facing down.
4. The dough should be left to rest for at least 1 minute before it is made into a loaf or bread rolls.

# Bread

---

## Preparation of free-form loaves and baguettes

Free-form loaves are loaves that are not baked in a tin.

1. Position the dough with the seam facing upwards and press in along the middle of the dough with the side of your hand.
2. Fold one side to the middle and press firmly. Repeat the process on the other side. Then turn the dough over and mould it into the shape you want.
3. There are 2 ways to create cracking:
  - If you want consistent cracking, the dough pieces need to be placed with the dough seam facing downwards and then scored on the smooth top.
  - If you want rustic cracking, the dough pieces need to be placed on their smooth side so that the dough seam faces up.

## What to do if ...

### ... the dough is too firm:

Add some liquid as the moisture content in flour fluctuates, meaning more or less liquid may be required to get a smooth dough.

### ... the dough is too moist:

Extend the kneading time, but do not exceed 10 minutes.

If the longer kneading time is not sufficient, gradually and rapidly knead in some flour.

### ... the bread “collapses”:

One option is to reduce the proving time. If the proving time is too long, too many gases are produced for the dough to hold. The dough has been over-proved and loses its shape.

Use cold liquid ingredients where possible as the dough warms up during the kneading process. If the dough temperature is too high, the fermentation process is accelerated.

Bake the bread at a higher temperature for the first 10 minutes.

## **... the bread has compact, moist spots (water streaks):**

Bake the bread at a lower temperature for the first 10 minutes.

The baking environment is too moist, meaning no moisture can be released from the dough.

Extend the proving stages to pre-bind more moisture in the dough structure.

## **... the bread cracks when it shouldn't:**

The environment should always be moist during the proving stage and the first baking stage. The moisture produces condensation on the surface of the dough, which produces a ductile skin.

The dough piece is not scored deeply or often enough.

## **... the bread has a dull surface:**

There needs to be sufficient moisture during the proving stage and the first baking stage. The moisture causes the starch to gelatinise on the dough surface.

## **... the bread is not crispy enough:**

Provide more moisture during the first baking stage to ensure that the bread does not become dry.

A longer baking time will release more moisture from the dough, which will form a thicker crust.

Bake the bread at a higher temperature for the first 10 minutes.

## Baguettes

Preparation time: 120 minutes  
Makes two loaves, 10 slices each

### Ingredients

21 g fresh yeast  
270 ml water | cold  
500 g plain white flour  
2 tsp. salt  
½ tsp. caster sugar  
1 tbsp. butter | soft

### Accessories

1 (1 ½) tsp. salt  
Pepper  
125 (190) g mozzarella  
125 (190) g grated Gouda

### For frying

½ tbsp. olive oil

### For the dough (Round baking tin)

10 g fresh yeast  
70 ml water | lukewarm  
130 g plain white flour  
½ tsp. caster sugar  
½ tsp. salt  
Dried thyme, ground  
½ tsp. oregano, ground  
1 tsp. oil

### For the topping (Round baking tin)

1 onion  
½ clove of garlic  
200 g tinned tomatoes, skinned and chopped  
1 tbsp. tomato paste  
½ tsp. caster sugar  
½ tsp. oregano, ground  
½ bay leaf  
½ tsp. salt  
Pepper  
60 g mozzarella  
60 g Gouda cheese, grated

### For frying

1 tsp. olive oil

### Accessories

Rolling pin  
Baking tray or universal tray or round baking tray and rack

### Preparation

Stir the yeast into the water to dissolve it. Add to the flour, sugar, salt, thyme, oregano and oil and knead for 6–7 minutes until you have a smooth dough.

Shape the dough into a ball, place it in a bowl and cover with a damp cloth. Leave to prove at room temperature for 20 minutes.

To make the topping, finely dice the onion(s) and garlic. Heat the oil in a pan. Sweat the onion(s) and garlic until translucent. Add the tomatoes, tomato paste, sugar, oregano, bay leaf and salt.

Bring the sauce to the boil and simmer on a gentle heat for a few minutes.

Remove the bay leaf, season with salt and pepper to taste. Slice the mozzarella.

Roll the dough out onto the baking tray or universal tray. If using the round baking tray, roll out the dough and place it in the tray. Leave to prove at room temperature for 10 minutes.

Start the Automatic programme or pre-heat the oven using the settings indicated for cooking stage 1.

Spread the sauce over the dough. Leave a gap of approx. 1 cm all the way round the edge. Top with the mozzarella and sprinkle on the Gouda.

Manual:  
Adjust settings according to cooking stage 2.

Place the pizza in the oven and bake.

## **Let's have meat!**

Meat such as pork, beef, lamb and game are healthy components of anyone's diet, and add a wealth of variety and enjoyment to it. Poultry is particularly recommended for our well-being. Meat can be prepared and cooked in a range of different ways, and by using diverse seasonings and serving it up with interesting sauces and side dishes, it can constantly be presented in new guises – both exotic and traditional – and even unite cultures through its versatility.

# Meat

---

## Tips on preparation

### Roasting

The high heat during roasting forms a brown outer layer. The remnants from this layer are what give the food the typical roasted taste.

- Coat poultry or meat with oil and season to taste before putting it in the oven.
- If an Automatic programme or recipe recommends using an oven dish, the Miele Gourmet oven dish has been optimally designed for these programmes. When using ovenproof glass, ceramic or stainless steel roasting dishes, you might need to reduce the quantity of liquid being added.
- Some programmes require you to add extra liquid part way through the cooking time, and sometimes you may need to remove the lid. An appropriate message will appear in the display. For manual settings, the step is noted in the recipe.
- Always place poultry in the oven with the breast side facing upwards. Brush the skin with lightly salted water 10 minutes before the end of the cooking time. This makes the skin nice and crispy.

### Low temperature cooking

Low temperature cooking requires the meat to be seared in a pan and then cooked at a temperature of less than 100 °C. This method is particularly suitable for lean cuts of meat to keep them succulent and tender.

- Use lean meat which has been correctly hung and trimmed. Bones should be removed before cooking.
- Do not cover meat during cooking.
- The meat is at an ideal temperature for eating immediately after cooking. Serve on pre-heated plates with a hot sauce or gravy to keep the meat warm.

## Food probe

You don't have to be a professional to have perfectly cooked meat. The core temperature of a piece of meat is a good indicator of how cooked it is. Many Miele ovens come with a food probe that helps you to get perfect cooking results.

- Make sure that the metal tip is inserted into the middle of the thickest part of the meat.
- If the piece of meat is too small or thin, you can place a piece of raw potato over the exposed area of the food probe.
- The tip of the food probe must not touch any bone, tendons or layers of fat.
- With poultry, insert the food probe deep into the thickest part of the breast meat at the front.
- When using the wireless food probe, the handle should point diagonally upwards where possible.
- An estimated cooking duration is indicated in the display at the start of cooking and this time is then adjusted towards the end.
- If you are cooking several pieces of meat at the same time, insert the food probe into the largest piece of meat.

## Stuffed duck

Preparation time: 135 minutes

Serves 4

### For the duck

1 duck (2 kg), ready to cook

1 tsp. salt

Pepper

1 tsp. thyme

### For the stuffing

2 oranges | diced

1 apple | diced

1 onion | diced

½ tsp. salt

Pepper

1 tsp. thyme, ground

1 bay leaf

### For the sauce

350 ml chicken stock

400 ml water

125 ml orange juice

125 ml white wine

1 tsp. cornflour

½ tbsp. water | cold

Salt

Pepper

### Accessories

Gourmet oven dish

Food probe

4 skewers

### Preparation

Season the duck with the salt, pepper and thyme.

To make the stuffing, mix together the diced orange, apple and onion. Season with the salt, pepper, thyme and bay leaf.

Fill the duck with the stuffing and secure with skewers.

Place the duck breast side up in the Gourmet oven dish. Insert the food probe. Place the Gourmet oven dish in the oven.

Automatic programme:

Start the Automatic programme. Mix the chicken stock and water. When prompted to do so in the display, pour in ¼ l of liquid every 30 minutes.

Manual:

Cook using the indicated settings. Mix the chicken stock and water. Pour over ¼ l of liquid every 30 minutes.

At the end of the cooking duration, remove the duck from the oven. Skim off any fat and pour the juices into a saucepan. Add the rest of the chicken stock, the white wine and the orange juice.

Stir the cornflour into the water and then add it to the sauce to aid thickening. Then bring to the boil. Season with salt and pepper to taste.

## Stuffed goose

Preparation time: 200 minutes

Serves 6

### Ingredients

2 tsp. caraway seeds, ground  
1 tbsp. marjoram  
Salt  
Pepper  
1 goose  
(3 ½ kg) without giblets, ready to cook  
2 apples  
2 unwaxed oranges  
3 spring onions  
250 ml red wine  
250 ml goose stock

### Accessories

Cocktail sticks  
Gourmet oven dish  
Rack

### Preparation

Mix the caraway seeds, marjoram, salt and pepper together and use the mixture to season the goose. Leave the spice mix to soak into the meat for around 15 minutes.

In the meantime, wash the apples and oranges thoroughly, and cut into large cubes without peeling them. Stuff the goose with the fruit. Use cocktail sticks to close the cavity if you want to.

Start the Automatic programme or pre-heat the oven.

Fill the Gourmet oven dish with approximately a finger's height of hot water. Place the goose breast side down in the Gourmet oven dish. Place spring onions around the goose.

Automatic programme:

Place the Gourmet oven dish in the oven and roast.

Manual:

Place the Gourmet oven dish in the oven and roast using the settings indicated for cooking stages 1, 2 and 3.

Turn the goose halfway through cooking. Pour the fat from the Gourmet oven dish into the saucepan.

After cooking, remove the goose from the Gourmet oven dish and allow to rest briefly. The orange and apple stuffing is only intended to add flavour and not to eat.

Remove the spring onions. Deglaze the meat juice with red wine, add the goose stock and leave to reduce on the cooktop.

Serve the goose with the sauce.

## Veal knuckle

Preparation time: 150 minutes

Serves 4

### For the veal knuckle

1 tbsp. oil  
1 ½ tsp. salt  
½ tsp. pepper  
1 veal knuckle (1.5 kg), ready to cook  
1 onion  
1 clove  
2 carrots  
80 g celery  
1 tbsp. tomato paste  
800 ml veal stock  
200 ml water

### For the sauce

75 g cream  
1 ½ tbsp. cornflour  
1 tbsp. water | cold  
Salt  
Pepper

### Accessories

Gourmet oven dish  
Food probe  
Hand-held blender  
Fine sieve

### Preparation

Mix together the oil, salt and pepper; then coat the veal knuckle with it.

Quarter the onion and stick the clove into it. Peel and roughly dice the celery and carrots.

Place the vegetables, tomato paste and veal knuckle in the Gourmet oven dish. Insert the food probe. Place the Gourmet oven dish in the oven and roast.

After 50 minutes, pour over half of the stock and half of the water. After 30 minutes, pour over the other half of the stock and water.

Remove the veal knuckle and vegetables from the oven. Take the clove out of the onion.

Place the vegetables and juices in a saucepan and make a purée. Pass the purée through a sieve, pour in the cream and bring to the boil.

Stir the cornflour into the water and then add it to the sauce to aid thickening. Briefly bring back to the boil. Season with salt and pepper to taste.

## Beef Wellington

Preparation time: 120 minutes

Serves 6

### Ingredients

850 g beef fillet, ready to cook  
Black pepper | freshly ground  
Salt  
1 tbsp. oil  
3 tbsp. butter  
2 shallots | finely chopped  
2 cloves of garlic | crushed  
250 g mushrooms | finely diced  
2 tbsp. fresh thyme leaves | chopped  
100 ml extra-dry vermouth  
150 g smooth liver pâté  
15 g fresh parsley  
12 slices of unsmoked bacon  
500 g puff pastry  
2 medium eggs | yolks only | whisked  
1 tsp. water

### For frying

½ tbsp. oil

### Accessories

Cling film  
Baking paper  
Baking tray or universal tray  
Food probe

### Preparation

Season the beef fillet with salt and pepper and coat all sides with oil. Heat the oil in a pan and sear the beef fillet all over until all sides are browned. Put in a cool place.

Melt the butter in the pan. Sauté the shallots and garlic in the pan until the shallots are translucent. Add the mushrooms and thyme. Sweat for another 5–6 minutes. Add the wine and

cook for another 10 minutes until the liquid has boiled off. Stir in the liver pâté and parsley. Season to taste. Leave to cool.

Place 2 overlapping pieces of cling film on a clean work surface or a large chopping board. Lay the strips of bacon in 2 rows so they slightly overlap in 2 layers. Spread half of the mushroom mixture onto the bacon. Place the beef fillet on top and spread the remaining mushroom mixture onto the fillet. Use the cling film to wrap the bacon around the beef fillet to create a tight, elongated roll. Place this in the fridge.

Roll out the puff pastry. Dust the surface with flour. Roll out a third of the puff pastry to approx. 18 cm x 30 cm. Roll out the rest of the dough to approx. 28 cm x 36 cm. Remove the beef fillet from the cling film and place it in the middle of the smaller pastry strip. Beat the egg yolk together with water and use it to brush the edges of the pastry and the top and sides of the encased fillet.

Use a rolling pin to carefully lift the larger piece of pastry and place it on top of the beef fillet. Press it on firmly. Form an edge that is about 3 cm wide. Seal the edge tightly using a fork. Brush the pastry dough all over with more egg yolk. Leave to chill for at least 30 minutes and for up to 24 hours.

Line the baking tray or universal tray with baking paper and place the Beef Wellington on top. Insert the food probe.

Start the Automatic programme or pre-heat the oven using the settings indicated for cooking stage 1.

## Roast gammon

Preparation time: 90 minutes

Serves 4

### For the gammon

1 kg gammon (loin), ready to cook

### For the pesto

50 g pine nuts

60 g sundried tomatoes in oil

30 g flat leaf parsley

30 g basil

1 clove of garlic

50 g hard cheese (Parmesan), grated

2 ½ tbsp. sunflower oil

2 ½ tbsp. olive oil

### Accessories

Universal tray

Food probe

Hand-held blender

### Preparation

Place the gammon joint on the universal tray and insert the food probe. Place the universal tray in the oven and roast the gammon joint.

To make the pesto, toast the pine nuts in a pan. Roughly chop the tomatoes, parsley, basil and garlic. Purée them together with the pine nuts, Parmesan and sunflower oil. Stir in the olive oil.

## Saddle of venison

Preparation time: 160 minutes + 24 hours for marinating

Serves 4

### For the marinade

500 ml red wine

250 ml water

1 carrot | diced

3 onions | diced

### For the saddle of venison

1.2 kg saddle of venison, ready to cook

1 tsp. salt

1 tsp. coarsely ground pepper

½ tsp. ground sage

½ tsp. thyme

60 g streaky bacon | sliced

### For the sauce

500 ml stock or game stock

350 g morello cherries from a jar  
(drained weight)

200 ml morello cherry juice (from the  
jar)

200 g cream

1 tbsp. cornflour

½ tbsp. water

Salt

Pepper

Sugar

### For frying

1 tbsp. oil

### Accessories

Gourmet oven dish

Universal tray

Food probe

### Preparation

To make the marinade, place the wine, water, carrots and onions in a pan and bring to the boil. While the liquid is still lukewarm, pour it over the saddle of venison and leave to marinate in the fridge for 24 hours.

Remove and dry the saddle of venison. Put the marinade to one side. Mix together the salt, pepper and herbs; then rub them into the saddle of venison.

Start the Automatic programme or pre-heat the oven.

Heat the oil in a Gourmet oven dish and sear the saddle of venison on all sides (approx. 1 minute per side).

Place the saddle of venison on the universal tray and insert the food probe. Cover the saddle of venison with bacon. Place the universal tray in the oven. Cook.

After 35 minutes, pour over the stock or game stock; then continue cooking.

To make the sauce, add some game stock to the Gourmet oven dish to dilute the juices. Drain the morello cherries, collecting the juice. Remove the saddle of venison; add the morello cherry juice, cream and water (or marinade) to the juices.

Stir the cornflour into the water and then add it to the sauce to aid thickening. Bring everything to the boil

and add the morello cherries. Season with salt, pepper and sugar to taste, plus the marinade if desired.

## **Come to the table!**

Many tasty meals flatter the taste buds far more than the figure. Therefore, it is comforting to know that fish dishes are notable exceptions to this and are every bit as healthy as they are tasty. Fish plays an important role in most cuisines and types of fish will vary depending on geographical location. In this chapter you will find a variety of fish specialities from around the world to enjoy.

## Tips on preparation

Various oven functions are suitable for cooking fish, for example Moisture Plus, Fan Plus or Conventional Heat.

The following tips will help you get the best results:

- Whole fish are ready when the eyeballs are white and the dorsal fin is easily pulled out.
- Roasted, steamed or grilled fish is cooked when the flesh comes away easily from the bones.
- Season fish to taste and dot with butter before putting it in the oven.
- Make sure that the metal tip of the food probe is inserted into the middle of the thickest part of the fish.
- If possible, insert the food probe behind the head of the fish parallel to the backbone.

### **The pleasure of your company**

When it comes to bakes and gratins, there are so many possibilities – you will struggle to find a dish with so many variations. The choice of ingredients is endless and you can combine them with seasonal produce and pantry staples. What's more, they are incredibly easy to prepare and extremely popular with guests. And if you happen to have leftovers, they taste great after reheating.

## Chicory gratin

Preparation time: 55 minutes

Serves 4

### For the chicory

8 heads of chicory

50 g butter

5 tsp. caster sugar

Salt

Pepper

8 slices of cooked ham (3–4 mm thick)

### For the cheese sauce

30 g butter

40 g plain white flour

750 ml milk, 1.5% fat

250 g cheese, grated

1 medium egg | just the yolk

Nutmeg

Salt

Pepper

1 dash of lemon juice

### Accessories

Ovenproof dish

Rack

### Preparation

Remove the hard, bitter part from each head of chicory.

Melt the butter in a pan. Sauté the chicory until golden brown. Then continue cooking on a low heat for 25 minutes.

Season with sugar, salt and pepper.

Wrap each chicory head in a slice of cooked ham. Lay them side by side in the ovenproof dish.

To make the cheese sauce, melt the butter in a saucepan. Stir in the flour and brown gently. Now add the milk,

stirring vigorously. Bring to the boil and stir in half of the cheese, the egg yolk, nutmeg, salt, pepper and lemon juice.

Pour the cheese sauce over the chicory and scatter the remaining cheese over the top.

Place the chicory gratin on the rack in the oven and bake until golden brown.

## Lasagne

Preparation time: 125 minutes

Serves 4

### For the lasagne

8 lasagne sheets (not pre-cooked)

### For the Bolognese sauce

50 g smoked streaky bacon | finely diced

2 onions, diced

375 g mince, half beef and half pork

800 g tinned tomatoes, skinned

30 g tomato paste

125 ml stock

1 tsp. fresh thyme | chopped

1 tsp. fresh oregano | chopped

1 tsp. fresh basil | chopped

Salt

Pepper

### For the mushroom sauce

20 g butter

1 onion | diced

100 g fresh button mushrooms | sliced

2 tbsp. plain white flour

250 g cream

250 ml milk, 3.5% fat

Salt

Pepper

Nutmeg

2 tbsp. fresh parsley | chopped

### For sprinkling

200 g Gouda cheese, grated

### Accessories

Ovenproof dish, 32 cm x 22 cm

Rack

### Preparation

To make the Bolognese sauce, start by heating a non-stick pan. Fry the diced bacon, add the mince and continue to fry, stirring constantly. Add the onions and allow to sweat. Chop the tomatoes. Add the tomatoes, tomato juice, tomato paste and stock. Season with herbs, salt and pepper. Allow to simmer for approx. 5 minutes.

To make the mushroom sauce, sweat the onions in butter. Add the mushrooms and sauté briefly. Sprinkle with flour and stir. Deglaze with the cream and milk. Season with nutmeg, salt and pepper. Allow the sauce to simmer for approx. 5 minutes. Finally, add the parsley.

To make the lasagne, layer the ingredients in the ovenproof dish in the order listed below:

- One third of the Bolognese sauce
- 4 lasagne sheets
- One third of the Bolognese sauce
- Half of the mushroom sauce
- 4 lasagne sheets
- One third of the Bolognese sauce
- Half of the mushroom sauce

Sprinkle the lasagne with the Gouda and place it on the rack. Then place in the oven and cook until golden brown.

## Moussaka

Preparation time: 100 minutes

Serves 6

### Ingredients

1.25 kg eggplants

Salt

90 ml olive oil

### For the meat sauce

1 ½ tbsp. oil

750 g mince, half beef and half pork

1 onion | diced

480 g tinned tomatoes (drained weight)  
| chopped

2 tbsp. fresh parsley | chopped

125 ml white wine

Salt

Pepper

3 tbsp. breadcrumbs

2 eggs | just the white

### For the béchamel sauce

40 g butter

40 g plain white flour

500 ml milk, 3.5 %

1 tsp. salt

Pepper

Nutmeg

50 g grated Gouda cheese

2 eggs | yolk only

### For sprinkling

50 g grated Gouda cheese

### Accessories

Rack

2 baking trays

Paper towels

Ovenproof dish, 32 cm x 22 cm

### Preparation

Cut the eggplants lengthways into 1 cm thick slices, sprinkle with salt and leave for approx. 20 minutes to draw out the liquid.

For the meat sauce, fry the mince in oil. Add the onions and continue to fry. Add tomatoes, parsley and wine. Season liberally with salt and pepper. Allow to simmer for approx. 15 minutes. Leave to cool slightly. To bind, fold in the breadcrumbs and egg white.

Pre-heat the oven using the indicated settings. Pat the eggplants dry with paper towels and lay across 2 baking trays. Brush both sides lightly with olive oil. Place the baking trays in the oven and cook.

Turn the eggplants halfway through cooking and continue to cook until they have lightly browned.

For the béchamel sauce, heat the butter, stir in the flour and sweat. Deglaze with the milk. Leave the sauce to simmer for 5 minutes while stirring constantly. Season with nutmeg, salt and pepper. Remove the pan from the cooktop. Stir in the cheese and egg yolk.

Arrange half of the eggplants in the bottom of the ovenproof dish and then add the meat sauce on top. Then layer the rest of the eggplants and coat with the béchamel sauce. Sprinkle the remaining cheese on the moussaka.

Place on the rack in the oven and bake until golden.

Serves 4

### For the pasta

150 g pasta (penne)

1 ½ l water

3 tsp. salt

### For the bake

1 ½ tbsp. butter

2 onions, diced

1 capsicum | diced into 1 cm pieces

2 small carrots | sliced

150 g crème fraîche

75 ml milk, 3.5% fat

Salt

Pepper

300 g Roma tomatoes | coarsely diced

100 g cooked ham | diced

150 g sheep's cheese with herbs |  
diced

### For sprinkling

100 g Gouda cheese, grated

### Accessories

Ovenproof dish, 24 cm x 24 cm

Rack

### Preparation

Cook the pasta in salted water according to the instructions on the packaging.

Heat butter in a saucepan and sauté the diced onions. Add the capsicum and carrots and sauté for a further 5 minutes.

Mix together the crème fraîche and milk; then add to the vegetables. Season liberally with salt and pepper.

Place the pasta, tomatoes, ham and sheep's cheese in the ovenproof dish. Stir in the vegetable sauce.

## Shepherd's pie

Preparation time: 100 minutes

Serves 8

### For the bake

2 onions | finely chopped  
2 carrots | diced  
2 sticks of celery | cut into small pieces  
1 kg minced lamb  
½ tsp. fresh thyme | finely chopped  
½ tsp fresh rosemary | finely chopped  
1 ½ tsp. tomato paste  
200 ml red wine  
1 tbsp. plain white flour  
250 ml chicken stock  
½ tbsp. Worcestershire sauce  
Salt  
Pepper  
1.5 kg floury potatoes | diced  
25 g butter  
2 ½ tbsp. milk, 3.5% fat

### For frying

2 ½ tbsp. butter

### Accessories

Ovenproof dish, capacity 2.5 l

### Preparation

Heat the butter in a pan. Sauté the onions for 2–3 minutes. Add the carrots and celery and sweat for another 8–10 minutes. Add the minced meat and brown, stirring constantly. Drain off any excess fat and add the thyme, rosemary, tomato paste and red wine.

Reduce to about a quarter on a medium heat, sprinkle in the flour and simmer for a further 2–3 minutes.

Add the stock and Worcestershire sauce and simmer for 45–50 minutes. Season with salt and pepper to taste.

While the meat is simmering, mash the potatoes together with the butter and milk.

Place the meat mixture in the ovenproof dish and top with the mashed potato. Place in the oven and bake until golden brown.

## **All's well that ends well**

It's true what they say – no one can resist a delicious dessert. An ice cream, soufflé or fruity confection is the perfect end to a meal, yet requires relatively little effort to make. Indeed, the most successful desserts are often those that need the least preparation.

## Viennese apple strudel

Preparation time: 70 minutes

For 2 strudels

### Ingredients

100 g breadcrumbs  
4 strudel pastry sheets (pre-packed)  
100 g butter | melted  
1.5 kg apples | thinly sliced  
150 g caster sugar  
50 g raisins  
Cinnamon

### For frying

50 g butter

### Accessories

2 tea towels  
Baking tray or universal tray

### Preparation

Heat the butter in a pan and lightly fry the breadcrumbs.

Place 2 strudel pastry sheets on top of each other so that they overlap slightly on a clean tea towel.

Brush the strudel pastry with half the butter and sprinkle with breadcrumbs.

Mix the apples together with the sugar, raisins and cinnamon. Place the apple mixture onto the breadcrumbs.

## Lemon meringue pie

Preparation time: 80 minutes

Serves 10

### For the dough

275 g plain white flour

150 g butter

25 g caster sugar

2 medium eggs | yolk only

1–1 ½ tbsp. water | cold

### For the filling

4 unwaxed lemons | juice and grated zest

75 g cornflour

500 ml water

5 medium eggs

175 g caster sugar

### For the topping

275 g caster sugar

### Accessories

Flan tin, Ø 25 cm

Rack

### Preparation

To make the dough, knead the flour, butter, sugar, water and egg yolk together to form a smooth dough and chill for 30 minutes.

To make the filling, mix the lemon juice, lemon zest and cornflour together. Bring the water to boiling point on the cooktop and stir in the lemon and cornflour mixture. Stirring constantly, continue to simmer until a thick custard forms.

Separate the egg whites from the yolks. Put the egg whites to one side for the topping. Then stir the sugar and egg

yolks into the custard. Bring back to boiling point, then take off the heat and leave to cool.

Roll the pastry out and use to line the flan dish. Pour the lemon custard into the pastry case and spread it out evenly.

Place the rack in the oven. Start the Automatic programme or pre-heat the oven.

For the topping, beat the egg whites with sugar until stiff. Then spread evenly across the lemon custard.
